

Campus Expansion Project

We are happy to provide the latest news on the Campus Expansion Project! Here's what is happening:

- The construction documents are nearing completion; initial pricing has been received and we are confident our estimated \$3 million goal will cover the cost of our preferred design.
- Our Expansion Project team is meeting with the Diocesan Building Commission on January 22 to present our preferred design and to receive their input. They will provide advice and actions needed to receive full Diocesan approval for the project.
- Room Captains have been appointed and have or will be calling you to discuss your participation in the project. We are asking for 100% participation from all school families. In order to meet a May 2011 ground-breaking, we need your pledge by March 1, 2010. Any questions? Go to the STCS website and click the link for **Building Today for Their Tomorrows** or call James Zorn at 602-565-2412 or Tracey Theisen at 602-840-0010 ext 204.

Did you know?

- *\$1.5 million has already been raised for this project by **Vision 2000: Building our Future** –a successful St. Theresa Parish capital campaign of the late 1990's that has led to many improvements to our school and parish campus. Thank you, St. Theresa Parishioners and **Vision 2000** contributors!*
- *Because of the **Vision 2000** effort, we're over half way to our goal!*
- *This building will not only provide New Preschool, Pre-Kindergarten, Kindergarten and Extended Care Rooms but also an art studio. And it will allow space for a music room and a dedicated junior high science lab within the current facility. For use by all grades, it will offer great amenities for learning!*
- *We are striving to make the building as "green" as possible. We are planning to include solar energy, geothermal heating and cooling and materials used to reduce energy consumption.*
